SUMMARY

B.Tech CSE (Data Science) student at Manipal University Jaipur (CGPA 8.87), with internship experience at Space Applications Centre (ISRO), Ahmedabad. Skilled in Python, ML, Scikit-learn, FastAPI, React, Node.js, MongoDB, SQL, and REST APIs.

EXPERIENCE

Intern - Payload Checkout and Test Division

May, 2026 - July, 2026

Space Applications Centre (ISRO)

Ahmedabad , India

- Built PAHAL, a full-stack web app (FastAPI, MySQL, HTML/CSS/JS) at ISRO's SAC, automating TC/TM card-pin and IP-address assignment for satellite payload testing.
- Designed core assignment logic with automated pairing/grouping, LLM-based alias generation, and database parity verification.

Director

Jan, 2026 - Feb, 2026

Elysium 2.0 (IEEE WIE), Manipal University Jaipur

Jaipur , India

- Led end-to-end planning and execution of a 100+ participant technology fest, heading editorial, communications, and documentation.

EDUCATION

B.Tech in CSE (Data Science), Manipal University Jaipur

2023 - present

CGPA - 8.87 (Cumulative)

Intermediate (12th Class), Sanskar School (CBSE)

2023

Percentage: 87.20%

Matriculation (10th Class), Sanskar School (CBSE)

2021

Percentage: 93.80%

PROJECTS

AI Study Planner | Full-Stack Web Application, AI Planning, Analytics

[LINK](#)

Built a full-stack study planning and progress-tracking platform with intelligent scheduling and analytics.

- Implemented rule-based AI planning logic and backend services to generate personalized schedules & dynamically reschedule missed tasks based on deadlines, difficulty, and workload.
- Developed secure RESTful APIs with JWT authentication and analytics dashboards to track study trends, subject-wise time distribution, and completion progress.

Customer Churn Prediction System | Machine Learning, Streamlit

[LINK](#)

Built an end-to-end machine learning system to predict telecom customer churn.

- Implemented a Column Transformer-based preprocessing pipeline to handle categorical and numerical features with encoding, scaling, and missing-value imputation.
- Trained a Random Forest Classifier on the Telco Customer Churn dataset, achieving **78.35% accuracy** and 0.82 ROC-AUC.

SKILLS

- Languages - Python, C/C++, JavaScript, SQL
- ML/Data Science - Scikit-learn, Pandas, NumPy, Matplotlib, Random Forest, Column Transformer pipelines
- Frameworks & Libraries - FastAPI, React, Node.js, Express, REST APIs, JWT Auth
- Tools - Git/GitHub, MongoDB, MySQL, Streamlit, VS Code, WAMP Server

ACHIEVEMENTS & CERTIFICATIONS

- Awarded for High Academic Performance - 2x
- NPTEL**: Introduction to Operating Systems; Database Management Systems
